

Dr. Maddalena Mastrogiacomo has a degree in Biological Sciences in 1996 from the University of Bari and doctoral in Cellular Biology in 2002 from the University of Torino. Her main research field include cell biology of mesenchymal progenitor cells, tissue engineering using biomaterials. She developed her expertise in the Laboratory of Regenerative Medicine at the National Cancer Research, Genova, Italy, focusing her work on pre-clinical and clinical study to bone tissue regeneration. She is currently employed at the Laboratory of Regenerative Medicine of University of Genoa as researcher. Dr. Mastrogiacomo is author of 44 publications in scientific journals and has been selected to present her works in national and international congresses. She is responsible of the training program of graduated students in Biotechnology and Regenerative Medicine, and responsible of Unit of study animal surgery in the Laboratory of Regenerative Medicine.
