

Dr Kai-Uwe Schlaudraff graduated from Medical School at the University of Freiburg / Germany where he received his MD degree in fundamental and clinical research on angiogenesis and growth factors in cardiovascular surgery. After having trained in London and Paris he completed his general surgery residency in Basel / Switzerland and received his training in plastic surgery as a resident and registrar at the University Hospital of Geneva / Switzerland.

He currently practices in his private clinic in Geneva with a special clinical interest in body contouring through ultrasound assisted liposuction and fat grafting. Dr Schlaudraff is part of various research projects with a focus on adipose derived stem and regenerative cells and fat grafting to the breast.

Dr Schlaudraff is Board Certified by the Swiss and the European Board of Plastic Reconstructive and Aesthetic Surgery and is a member of ISAPS since 2009.
